GAME FEATURES

Walking Wilds

- In any one spin, one special 'Walking Wild' (the Golden Parrot) can appear at a random position on any reel. It will trigger a re-spin while 'walking' one position to the left. This will continue until it has 'walked' off the panel.
- A new Walking Wild can appear during each re-spin. The re-spin sequence only stops once there are no 'walking wilds' on the panel.
- Scatter symbols continue to appear during Walking Wild re-spins and will 'shine through' walking wilds.
- Should free spins be triggered more than once during a Walking Wilds sequence, the Pirate Compass will appear multiple times accordingly, awarding a random amount of free spins each time.
- There are no Walking Wilds during free spins.

Wild Symbol

- Replaces any symbol except the scatter symbol.

Scatter Symbol

- All reels can contain Scatter symbols.
- The Scatter also pays out if two, three, four or five instances of the symbol land anywhere on the panel.
- Three or more Scatters landing anywhere on the panel will trigger the free spins bonus feature.
- Scatter wins and payline wins are added.

Freespins

- When triggering freespins, The Pirate Compass will display after the spin has completed and randomly award 10, 12, 14, 16 or 18 free spins
- During free spins, all standard wins are multiplied by 4, with line win combinations involving the Wild symbol paying double (8x base game payable value).
- Free spins can re-trigger.

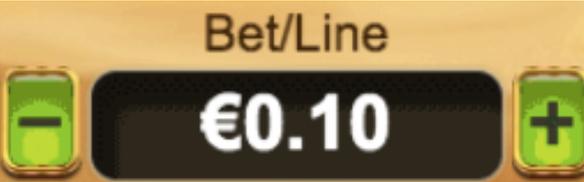

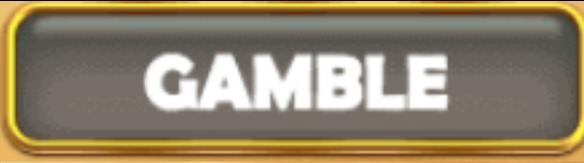

Gamble Ladder

- The ladder gamble can be entered by clicking the gamble button after a win.
- The player's stake (win from normal game) dictates their starting position on the ladder
- The player can gamble their win by clicking the gamble button with the ladder symbol. In case of a win, you will land on the highlighted step above your current one, in the case of a loss, on the highlighted lower one.
- Players can opt to use the Gamble Ladder to potentially increase any single base game win or the total winnings from free spins.
- Players can choose to collect an amount equal to the current highlighted step minus the lower step; the rest remains available as the new Gamble Amount and can still be gambled.
- Where the player enters the gamble feature with a stake that is not a value on the ladder, then the probability of winning or losing is proportional to the gamble amount, and the gamble win.
- The maximum cap value for gamble is 150.00 if the starting win amount is <150 and 30,000.00 if the starting win amount is >=150.
